FAQ

1) What devices can you control with Wi-Fi IR remote control?

- You can control TV, fan, Air conditioner and other IR enabled appliances.

2) What should I do when I cannot control the devices with this remote control?

- Firstly, make sure your mobile devices and the Wi-Fi remote control are adjacent and connected to the same network. Make sure the Wi-Fi infrared control is always powered ON.

3) Can I control devices through 2G/3G/4G network?

- The Wi-Fi remote control and mobile device are required to share the same Wi-Fi network when adding Wi-Fi remote control, the first time, after device configuration is completed, you can remotely control devices through 2G/3G/4G network. Currently it does not support 5G

4) What should I do when device configuration process has failed?

- Check whether the remote control is powered ON or not.
- Check whether your mobile device is connected to 2.4Ghz Wi-Fi network.
- Check your network connectivity, make sure the router is working properly.
- Make sure the Wi-Fi password enter is correct when adding remote control.

5) Can the IR remote control be controlled though walls?

- IR is not designed to work through the walls, so make sure there are no obstacles between the IR remote and IR enabled devices.

6) Unable to use IR remote to control electric device?

- IR remote network is in working condition (click any key on the remote control panel on the app and see whether the indicator light flashes. If it is flashing which mean the device is working properly.
- Make sure there is no object blocking between IR remote and electric device.

SPECIFICATION

Password

Confirm

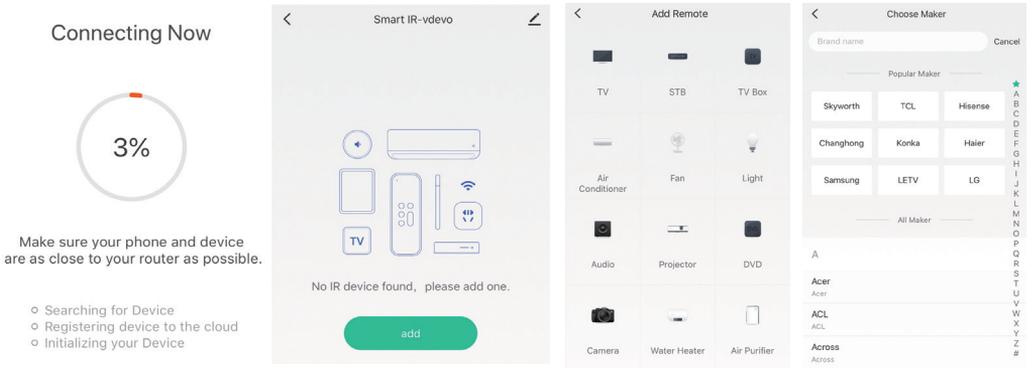

Step10: Once you have successfully completed step 9, you will be redirected to below page, where the App searches, registers and initializes the device (ref image below)

Step11: Once your device is successfully added then click to add TV, TV Box, Fan and etc with different brand via Quicl Match or Manual Mode. Example for TV as below

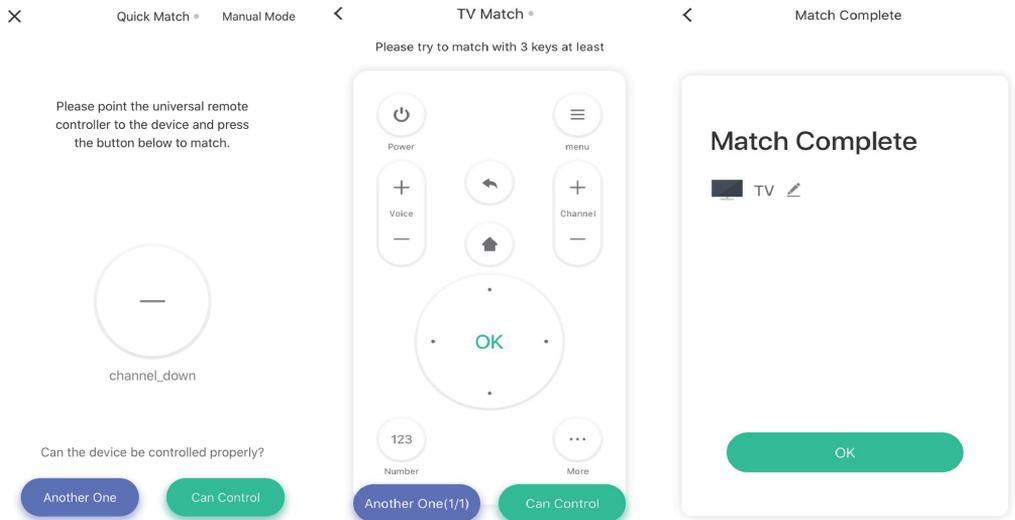

A. Quick Match:

Step 1: Choose the IR device

Step 2: Search the device brand

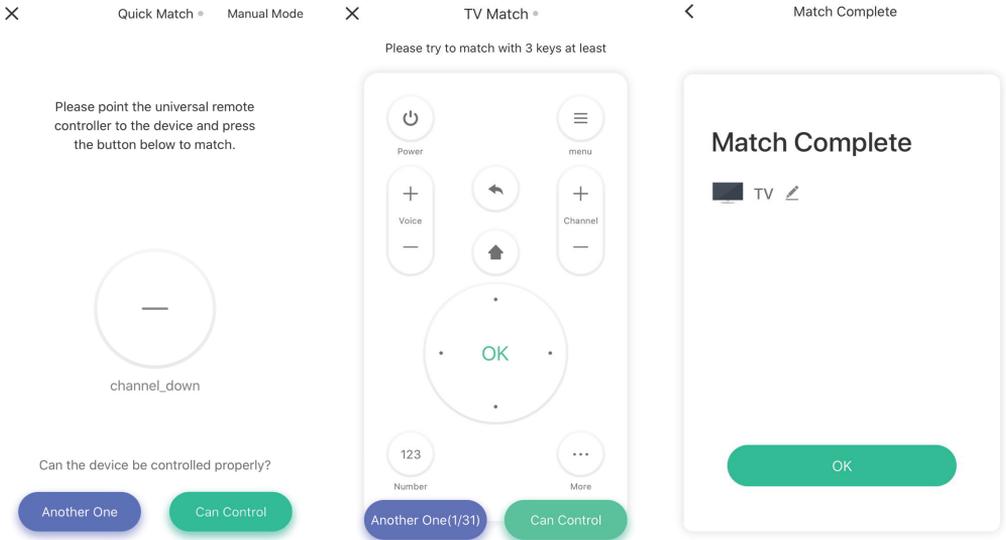

Step 3: Keep your IR Box point to the IR device and press the button to control device, if device can be controlled, start next button. After 3 buttons controlled well then try 3 more buttons, if ok press the "can control", then match completed.

B. Manual Match:

Step 1: Choose the IR device

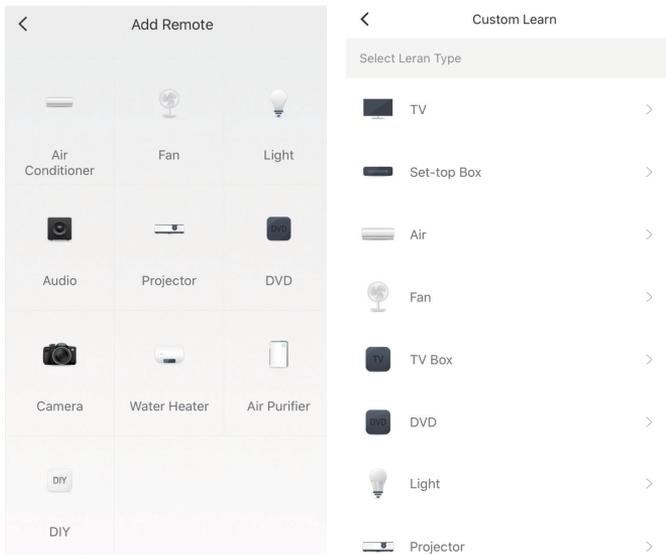

Step 2: Search the device brand

If you can not find the brand of the added device in the list, you can click "DIY" to copy the function keys of your remote control into the device.

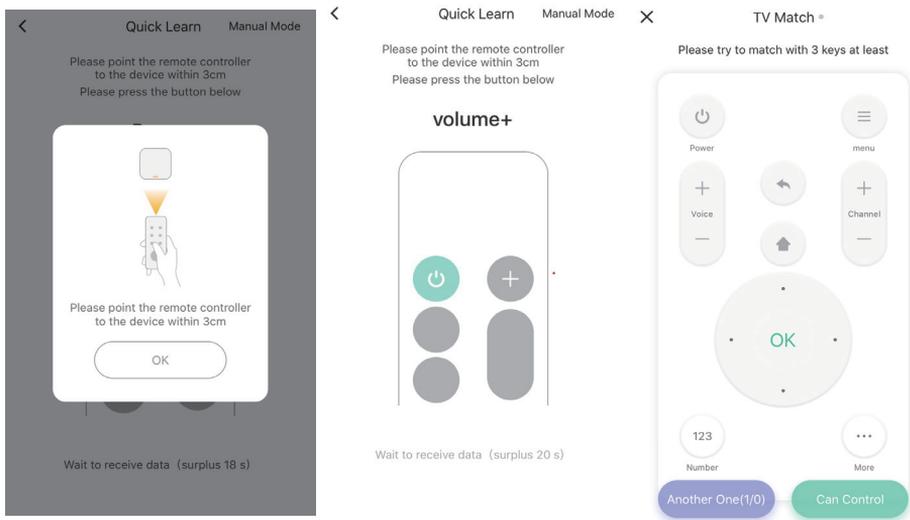

Quickly Learn:

Step 1: Choose the device you will control

Step 2: Keep the original remote control and smart remote within 3cm,press the original remote button below, learning done when changing green color, ensure three button done.

Step 3: Enter into the confirmation page, use 3keys to confirm you match correct device, choose the "can control", then copy completed.

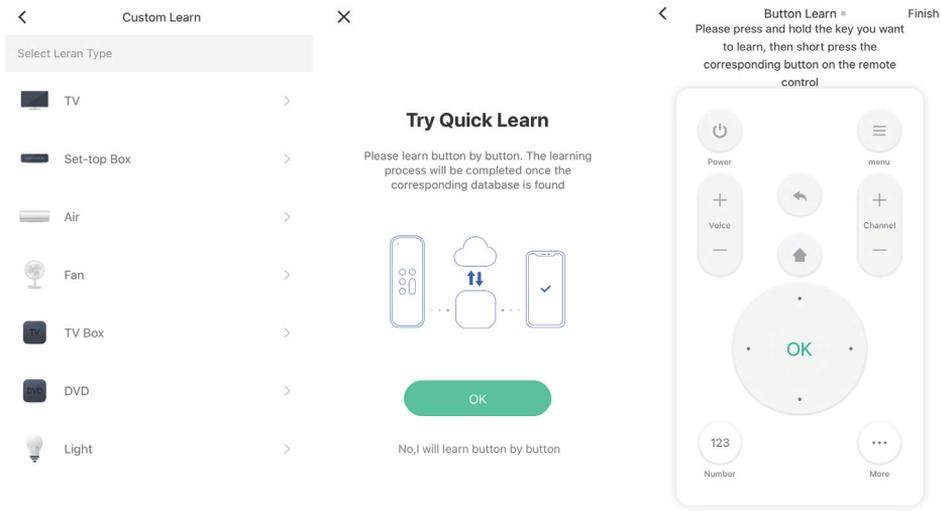

Button Learn:

Step 1: Choose the device you will control.

Step 2: Choose "the learn button by button" and follow the page to continue.

Step 3: Keep the original remote & smart remote within 3cm distance. Long press to the copy button on App, at same time, short press the key on your remote control, the app button color will change into white color, then copy completed. One by one finish all buttons you want.

Notes:

- 1. It supports signal frequency learning at 38KHz carrier frequency, if the IR remote is unable to receive commands from an IR device, it is likely that the carrier frequency of IR the device does not match, unable to copy commands
- 2. DIY does not support voice control.

Main Functions

1. Tap-to-Run Control multiple devices with one tap or by using an AI speaker through voice commands, click "Add 'Tap-To-Run'" button, select type, then click "+" to add conditions and action.
